Office Environment

Aluminum Awning Window

Aluminum Awning windows range are a great way to invite natural light and ventilation into your home. They can also be combined with fixed lites allowing you to find the perfect window to suit your home's design and aspect. Hinge from the top and opening at the bottom.

Feature

- Natural ventilation year-round, with a top hinged design that allows air-flow even during light rain showers
- Opening chain-restrictions for improved safety of upper storey windows.
- Security and insect screens installed within the frame allow easy access to the winder
- Minimum corrosion with stainless steel chains
- Long-lasting santoprene seals provide superior protection against harsh Australian weather conditions

Hardware

Doric DS1177 Chain Winder

- The DS1177 incorporates smooth operating systems and contemporary styling along with durability
- The DS1177 chain winder achieved over 30,000 cycles under full load when tested on a 30kgs window
- Polesium housing with zinc passivated mild steel chain, Inbuilt restriction switch to easily restrict chain extension.

Aluminum Sliding Window

Aluminum sliding windows is very popular in office blocks and developments in country areas because of its easy install and operate features. It opens with the sash sliding left or right.

Feature

- Has two or more sashes, which pass each other horizontally within the frame
- Easy cleaning thanks to wide window track that fits most vacuum heads
- Optional locking handles, and keyed vent locks for locking windows slightly open
- Fully weather sealed around the frame, minimizing draughts, dust and water intrusion
- Smooth and silent sliding movement, available in a range of finishes

Hardware

Ds6005 Avon Sliding Window Lock

- Fully weather sealed around the frame, minimizing draughts, dust and water intrusion.
- Top tilt position allows draft-free ventilation and offered total rain protection.
- Multi point locking system for enhanced security, stainless steel hardware that is built to last for years

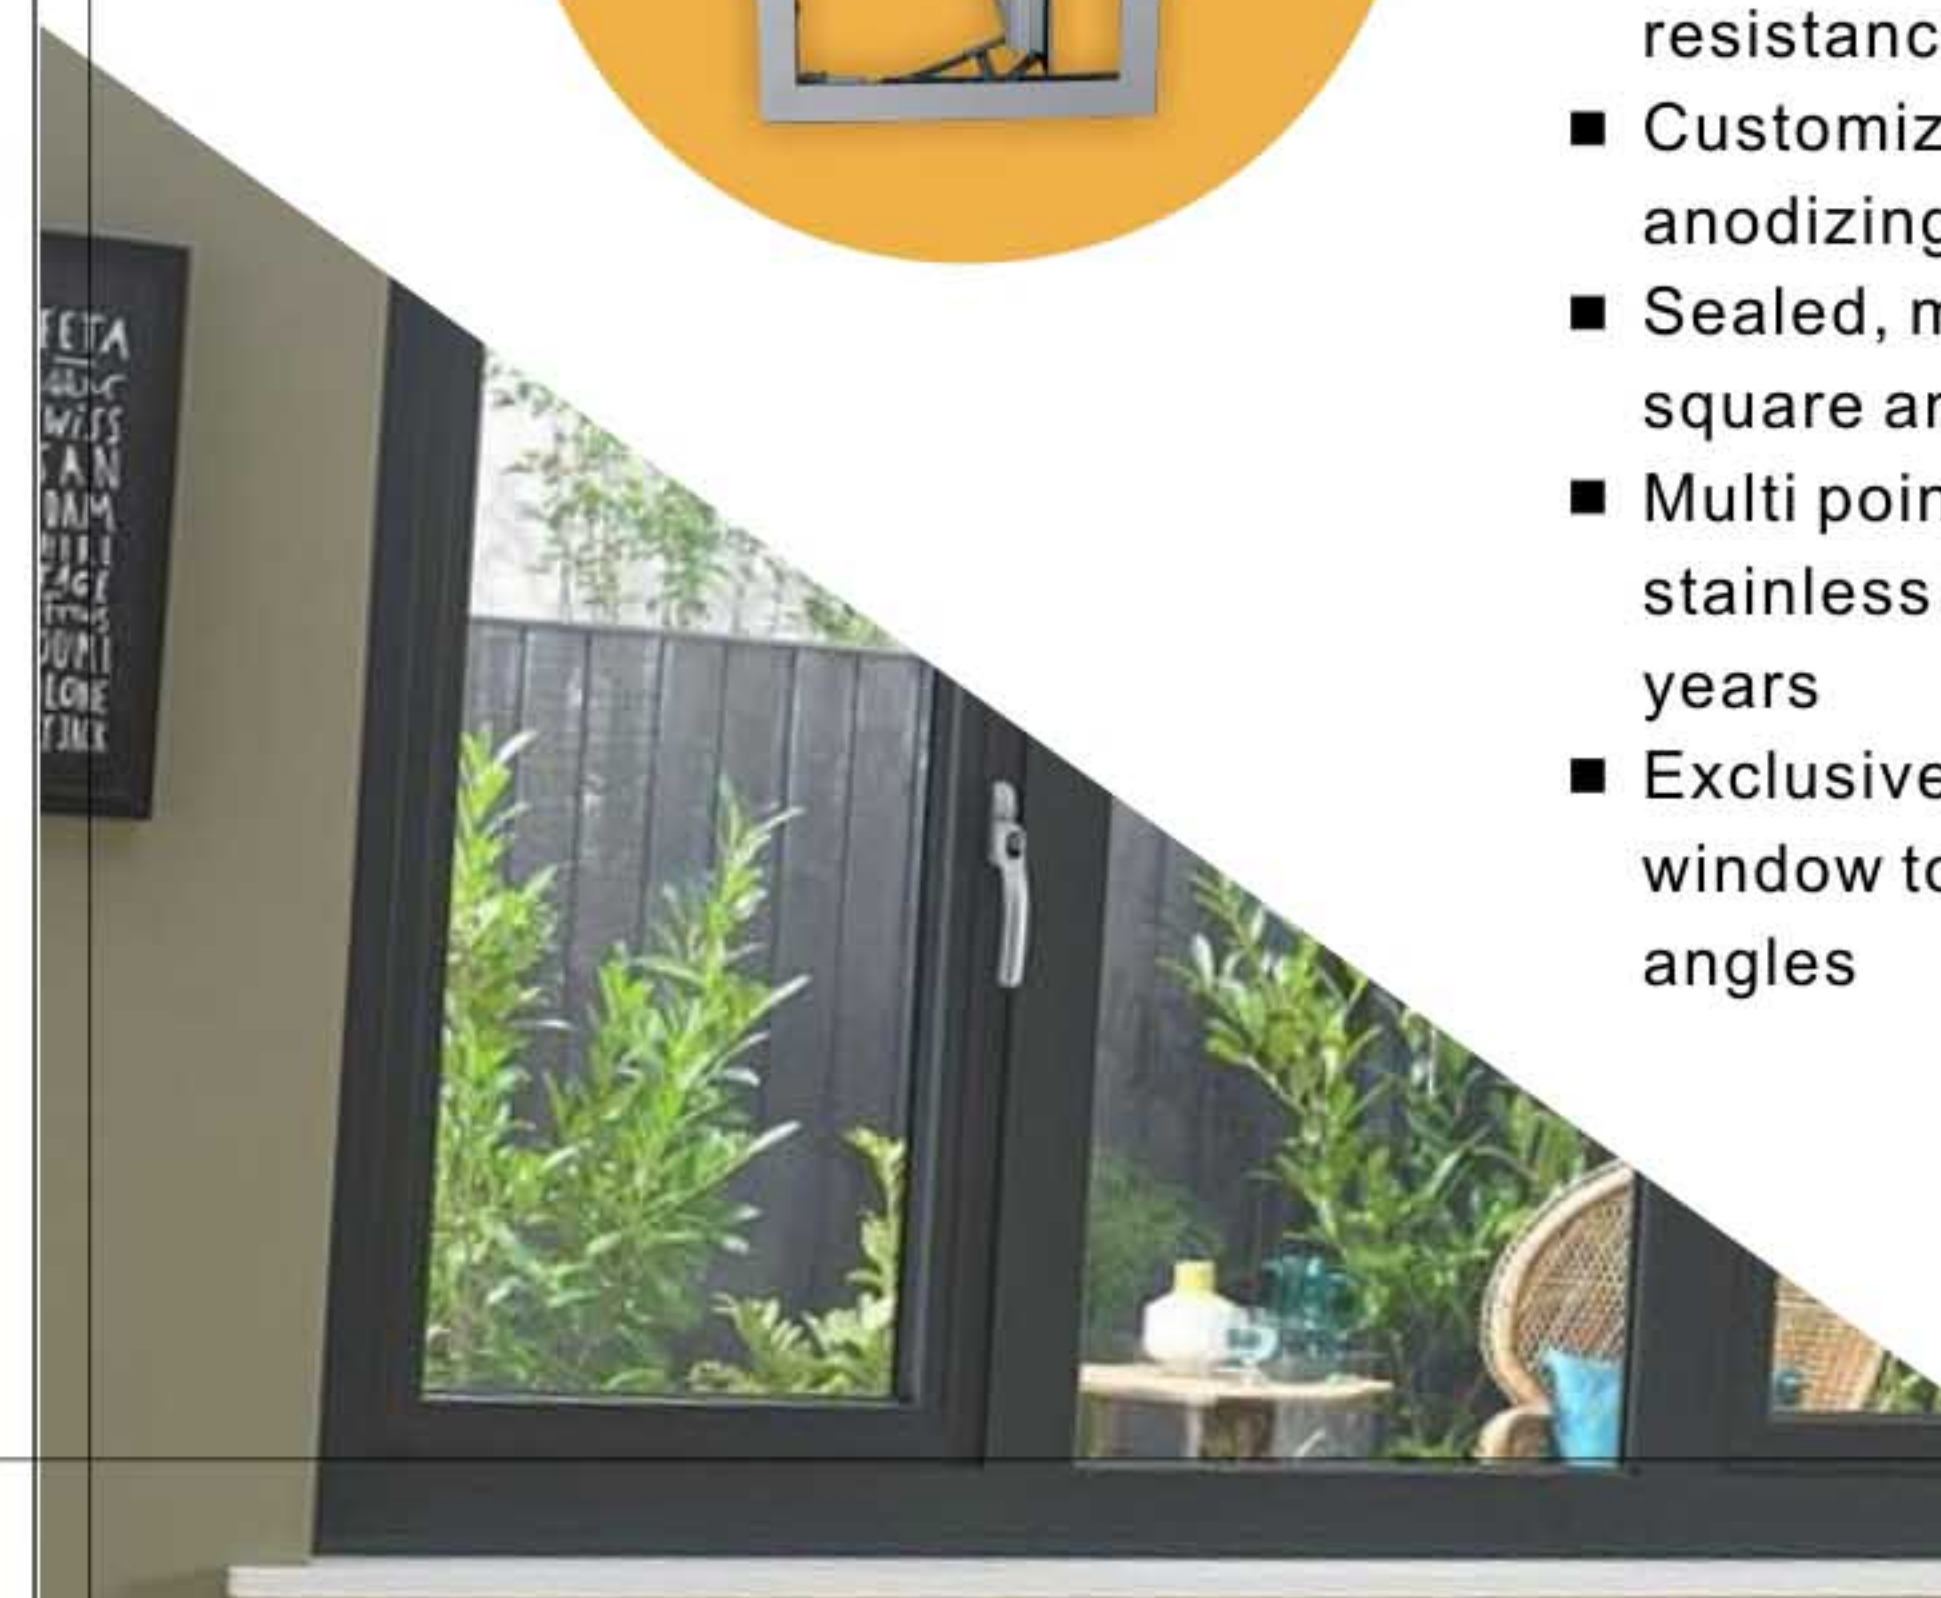

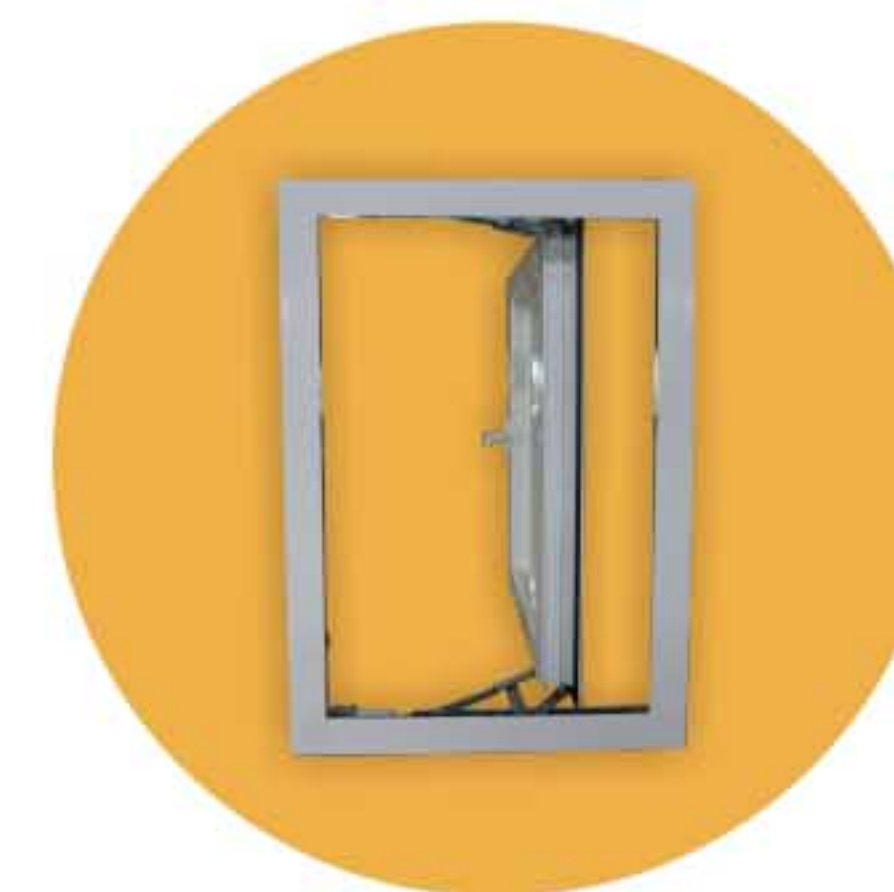

Aluminum Casement Window

Suitable for a wide variety of home styles. Aluminum Casement Windows are hinge on the side, can either swing inward or outward, wide open from top to bottom and side-to-side, past 90 degrees from the jamb. Providing excellent natural ventilation and light.

Feature

- Engineered and tested to Australian Standard AS2047 for structural performance and weather resistance.
- Customized color design with powder coating, anodizing and PVDF surface treatment.
- Sealed, mechanically-jointed corners that stay square and true over time
- Multi point locking system for enhanced security, stainless steel hardware that is built to last for years
- Exclusive friction limiter device allows the window to be locked open at multiple pre-set angles

Aluminum Tilt & Turn Window

Engineered and tested to Australian Standard AS2047 for structural performance and weather resistance. Customized color design with powder coating, anodizing and PVDF surface treatment. Sealed, mechanically-joined corners that stay square and true over time Multi point locking system for enhanced security, stainless steel hardware that is built to last for years Exclusive friction limiter device allows the window to be locked open at multiple pre-set angles

Feature

- Engineered and tested to Australian Standard AS2047 for structural performance and weather resistance.
- Customized color design with powder coating, anodizing and PVDF surface treatment.
- Sealed, mechanically-joined corners that stay square and true over time
- Multi point locking system for enhanced security, stainless steel hardware that is built to last for years
- Exclusive friction limiter device allows the window to be locked open at multiple pre-set angles

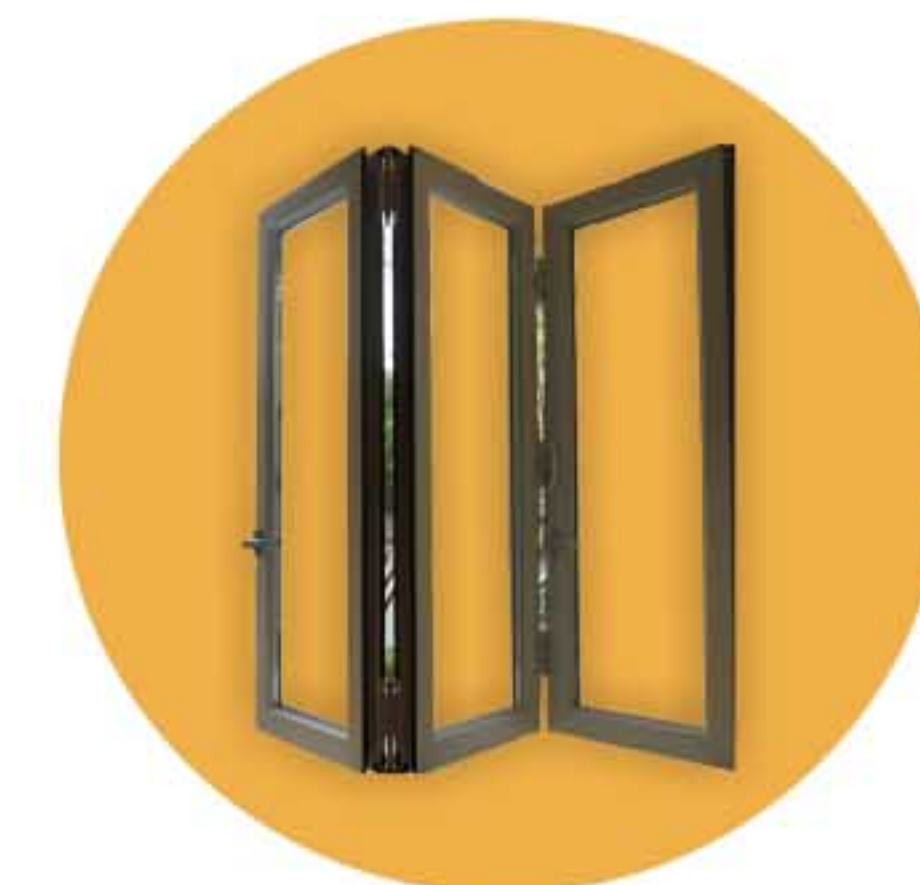

Aluminum Folding Window

Aluminum Folding windows consist of multiple panels of glass hinged together which run on a track and can be opened up in a concertina style to make a large, uninterrupted opening. They're a popular choice for servery windows

Feature

- Customized color design with powder coating, anodizing and PVDF surface treatment
- Allow pretty much the entire size of the window to be open, making the maximizing air flow
- Hidden hinge design for concise looking
- Strong bottom-mounted roller system makes the window sliding smooth and long-term operation
- Retractable Screen or Accordion Screen can be applied.

Aluminum Bay & Bow Window

Aluminum Bay & Bow windows are created from a combination of three windows projecting outward, typically with a large middle window, framed on either side by two smaller windows. They can offer numerous benefits for a home. And general bring in more light, give a better and wider peripheral view, which in return give a feeling of spaciousness to a room.

Feature

- Can be constructed from different combination of windows, fixed panels combined with either awning, casement or tilt & turn window.
- Can be combined into any angle like 90 degrees and 135 degrees
- Screen can be applied for Bay & Bow Window

Aluminum Louver Window

Aluminum louver window creates naturally comfortable buildings through light, air and space. It also help you to create a living space that works with nature rather than against it. It can also be left open in gentle rain can be cleaned from inside the building(handly for multi storey homes).

Feature

- Energy efficiency, health and productivity of building occupants.
- Open wide to maximize ventilation in comparison to other window type.
- Reduced need for air conditioning to keep the room at a comfortable temperature, saving electricity and the running costs of a building.
- Low maintenance and can be powder coated in a wide range of colors or simply anodized.

Aluminum Sliding Door

Aluminum Sliding doors are a great solution when you're trying to "keep up appearances" contain the budget or work with a smaller doorway. They're a brilliant space-saver requiring zero swing space and a great alternative to hinged doors. These doors can also be made taller and wider by adding more sashes.

Feature

- Narrow sightlines to highlight expansive views.
- Sealed, mechanically-joined corners that stay square and true over time
- Thermally Improved Aluminum provides less heat/cold transfer, improving insulating ability (available in some areas)

Hardware

Doric DS3130 sliding patio door lock

- Two large 6mm thick pressure cast opposing action hook tongues.
- Standard model offers selectable deadlatched or deadlocked security functions.
- Incorporates an anti-crash feature to prevent keeper damage.

Aluminum hinge door

Aluminum hinge doors allow for large openings and are often used on balconies or light commercial entrances with medium traffic. They are also used extensively as front and back residential entrance doors, inward and outward opening. The door can be single or double. They are fitted with top quality hardware ensuring easy maintenance and effortless operation.

Feature

- For a multiple-pane look, choose from a variety of grid options available to create the look of individual lites.
- Double faced lock system adopted, improve the security.
- Stainless steel pins and nylon bushes ensuring the highest levels of performance combined with the optimum aesthetics.

Aluminum Folding Door

Aluminum Folding patio doors come with the assurance you expect from a quality designed product. The Smart aluminum profiles are designed to give strength and durability to ensure a structurally sound product that requires minimal maintenance and delivers reliable performance over a lifetime of use. It's the perfect way to extend your kitchen, sun room, lounge or bed room.

Feature

- Available in almost all RAL colors, with the dual option of different colors on either side available
- Choice of open in or out, stack left or right, open at the center, end or in-between pillar-less doors from SMART aluminum.
- Slim sightlines allow more light into the building and give a pleasing appearance
- Highly engineered and robust hinges, specially designed stainless steel rollers give smooth and easy operation

Aluminum Tilt & Slide Door

The aluminum tilt and slide doors are very similar to sliding doors, the only difference being that the door sash can be tilted inwards, from the top, it grants perfect seal with great versatility and security. These doors are functionally balanced and well-fitted tilt and slide door can make a real difference to your home.

Feature

- High quality stainless steel, extruded aluminum and special polymers guarantees corrosion resistance and durability.
- Caps and covers can be powder coated in your preferred color offering plenty of design freedom for finishes.

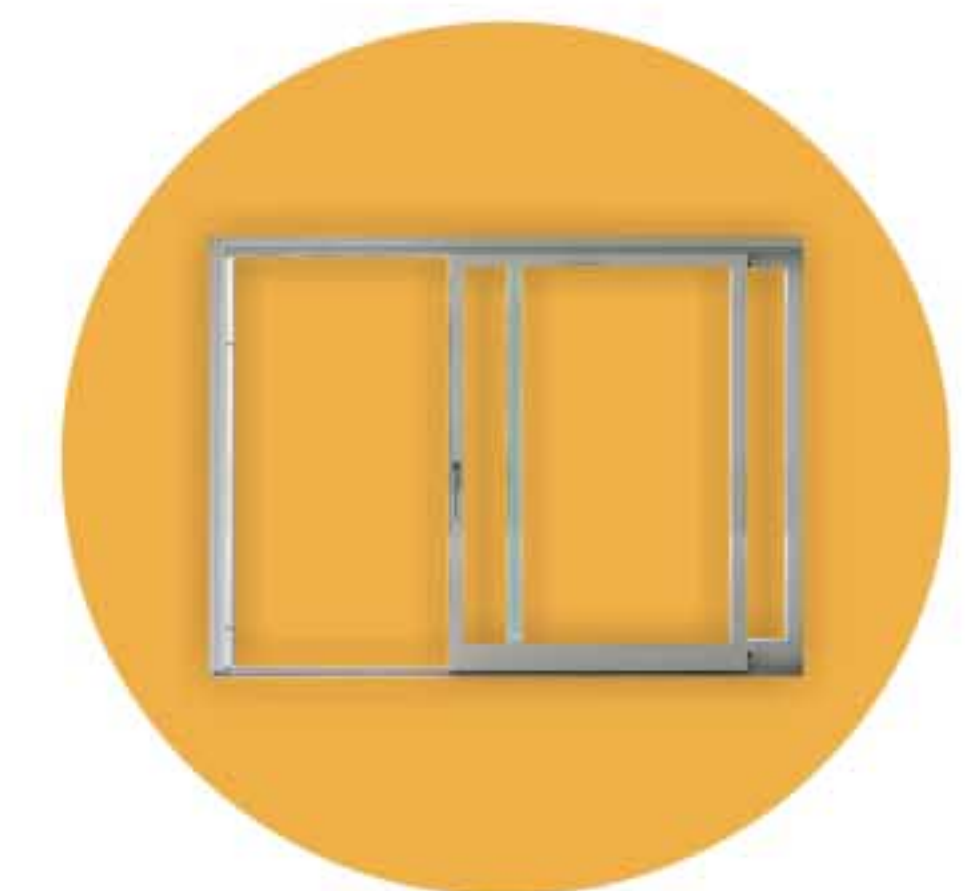

Aluminum Lift & Slide Door

Aluminum Lift & Slide doors offer great openings with 20 feet maximum width made from just two large glass panels, Lift-Slide doors are a quintessential tool for modern living. No other type of patio door can offer expanses of glass this big without dividers limiting your view.

Feature

- Highly energy efficient.
- Extremely simple and easy to operate.
- Unobstructed views to the great outdoors while offering high levels of protection against burglars

Residential in Australia

Villas in Nevis

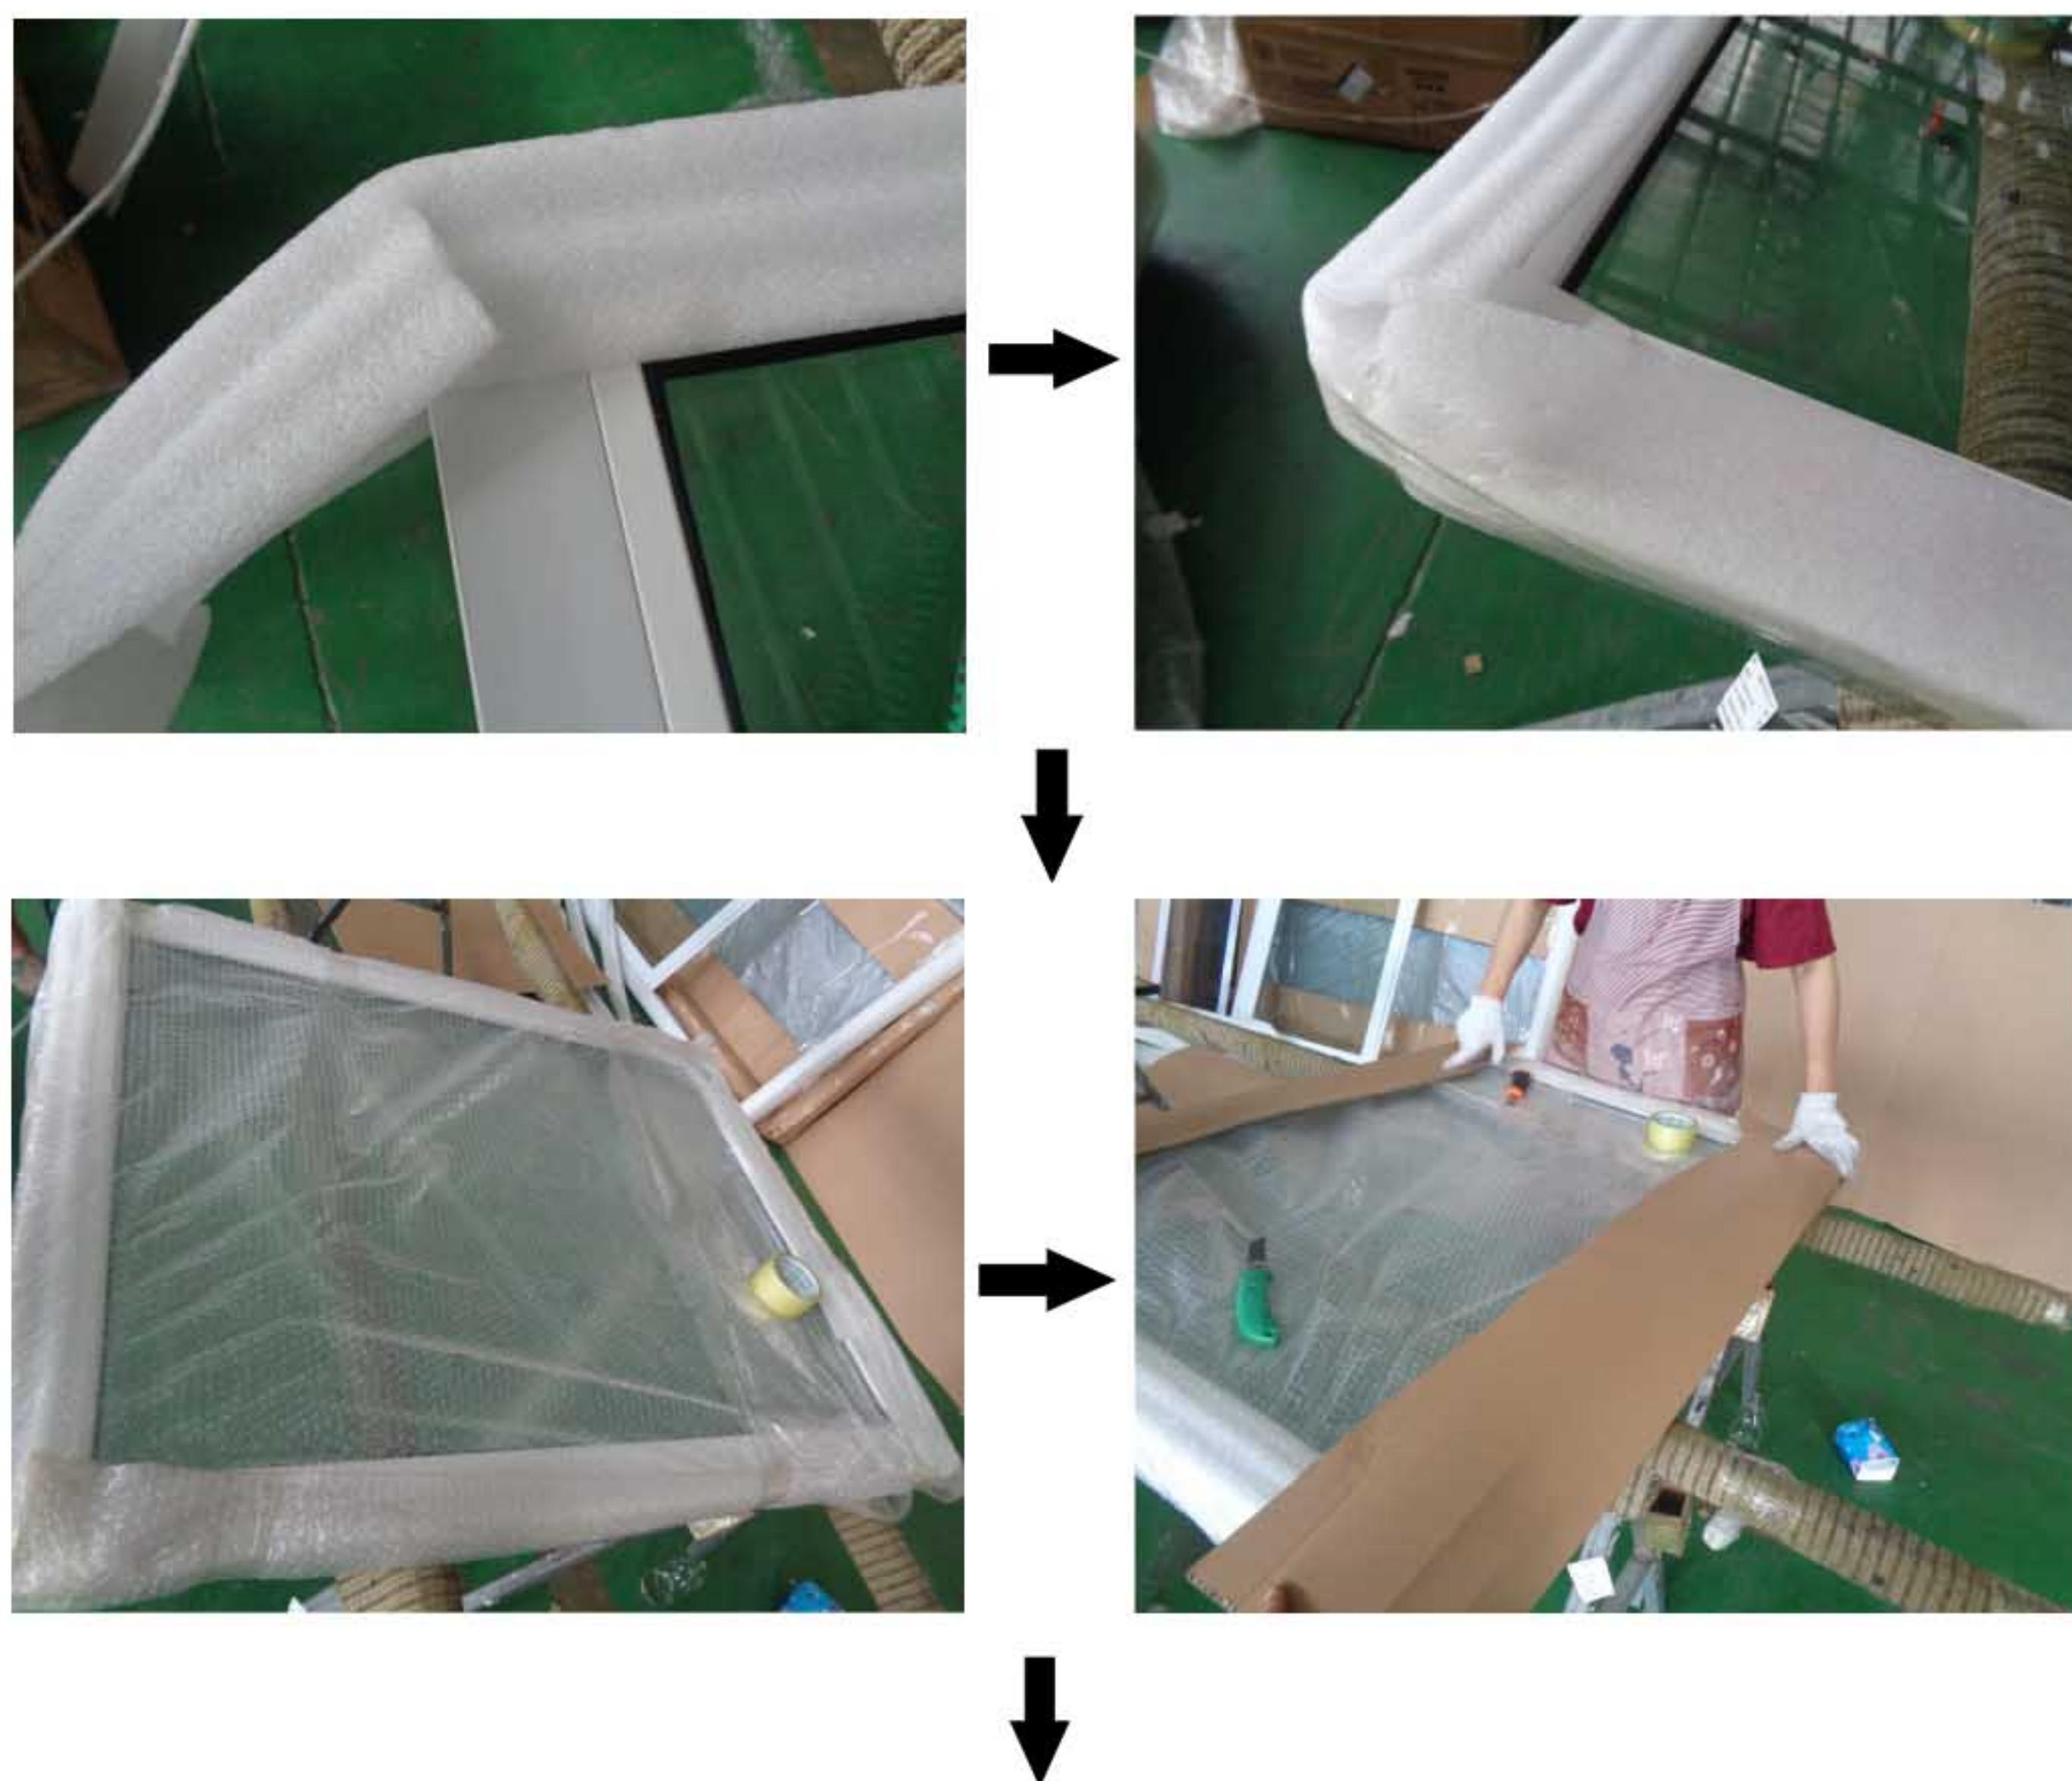

Hotel In India

Residential in Australia and New Zealand

Packing

- The second layer is bubble to protect the glass, avoid the water and other liquid permeation during transfer
- The third layer is carton
- The last is with steel pallet.

Loading Container

- Every window with a sticker, shows the window code as per design drawing
- For fast storing, store and installaion

Testimonials

- I really appreciate our relationship and your products are great I am finally building my house and putting up the windows that I bought 4 years ago.They are absolutely beautiful will send u pics so u can use in your brochures when the house is finished
Sent from my iPhone

---Dion

- Bad photo but that's your window being lifted in place with a 20 ton excavator.
We brought in a specialist window person from 1,000 miles away to put the windows in and he was very impressed with the quality of the windows He said that the offset weep/drainage holes are better than they use in Australia and the dimensions were also very accurate so.. Thank you so much for such a good job and I have enjoyed working with you.
Yes I will get everyone I know to buy from you.

---Michael

- Sorry for the long delay in replying to your e-mail. The work on the house has finally gone forward in leaps and bounds with the roof being completed and the plasterers almost finished. I will endeavour to send a photo or two with this e-mail showing your product installed into the house.
My wife and I are very happy with the windows and doors , they really highlight the appearance of the house and have drawn a lot of interest from passing car and pedestrians.Kind regards

---Myk

- Hi Benson,
We are almost finished installing the windows from the last shipment and I am happy to report that all of the windows so far fix perfectly including the arches.
Thanks so much for the level of efficiency and quality I received from you thus far.
I will contact you soon!

Lawrence Taylor
